Rubrics are a great way to set up assessment criteria for scoring student work. They specify the qualities or processes that must be exhibited. In Canvas the rubric rows are used to define the various criteria being used to assess an assignment. The columns are used to define levels of performance for each criterion. Rubrics can be used in assignments, graded discussions, or quizzes to make the grading process easier in Canvas. Once they are created they can be reused for other assignments and in other courses.
